

PMPC MUNICIPAL WATER RESOURCES PROJECTS

Names: Sinclair 500,000 Gallon Tank and 12" Transmission Line, Water Distribution Modifications and Chemical Cleaning of Water Mains

Client: Town of Sinclair

Location: Sinclair, Wyoming

Status: Completed 2005

Project Descriptions:

Projects included conceptual design and construction of water system including tank and transmission line, bidding and negotiations, construction inspection and post construction services. In addition, PMPC investigated and provided the town with recommendations for the water system modifications and line cleaning. Plans and specifications were prepared for the chemical cleaning of the existing water mains with the town's system.
